

Clays and Clay Minerals

Volume 64 Number 5 2016

Contents

Sequestration of catechol and pentachlorophenol by mechanochemically treated kaolinite <i>Valeria Ancona, Paola Di Leo, and Maria Donata Rosa Pizzigallo</i>	513
XRD and TEM studies on nanophase manganese oxides in freshwater ferromanganese nodules from Green Bay, Lake Michigan <i>Seungyeol Lee and Huifang Xu</i>	523
Surface crystal chemistry of phyllosilicates using X-ray photoelectron spectroscopy: A review <i>Chiara Elmi, Stephen Guggenheim, and Reto Gieré</i>	537
Synthetic zeolites derived from fly ash as effective mineral sorbents for diesel fuel spill remediation <i>Pingqiang Gao, Yan Zhang, and Lin Zhao</i>	552
Adsorption of Cu(II) on rhamnolipid-layered double hydroxide nanocomposite <i>Yan Li, Hao-Yu Bi, Hui Li, and Yong-Sheng Jin</i>	560
Near-infrared study of water adsorption on homo-ionic forms of montmorillonite <i>Valéria Bizovská, Helena Pálková, and Jana Madejová</i>	571
Clays in the Critical Zone: An Introduction <i>Paul Schroeder</i>	586
Clay minerals in deeply buried paleoregolith profiles, Norwegian North Sea <i>Lars Riber, Henning Dypvik, Ronald Sørli, and Ray E. Ferrell, Jr.</i>	588
Illite-smectite-rich clay parageneses from Quaternary tunnel valley sediments of the Dutch southern North Sea – mineral origin and paleoenvironment implications <i>Branimir Šegvić, Antonio Benvenuti, and Andrea Moscariello</i>	608
Adsorption of soil-derived humic acid by seven clay minerals: A systematic study <i>Rebecca A. Chotzen, Tamara Polubesova, Benny Chefetz, and Yael G. Mishael</i>	628
Kaolinite and halloysite derived from sequential transformation of pedogenic smectite and kaolinite-smectite in a 120 ka tropical soil chronosequence <i>P. C. Ryan, F. J. Huertas, F. W. C. Hobbs, and L. N. Pincus</i>	639
Traprock transformation into clayey materials in soil environments of the Central Siberian Plateau, Russia <i>Sofia N. Lessovaia, Michael Plötze, Svyatoslav Inozemzev, and Sergey Goryachkin</i>	668
Characteristics of early Earth's critical zone based on middle–late Devonian paleosol properties (Voronezh high, Russia) <i>Tatiana Alekseeva, Pavel Kabanov, Andrey Alekseev, Pavel Kalinin, and Veronika Alekseeva</i>	677
